Sir:

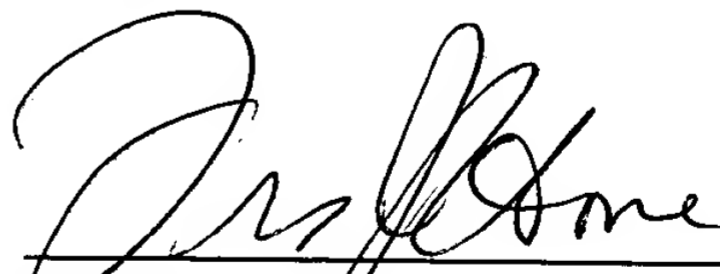

The Decision on Petition under 37 C.F.R. 1.47(b) mailed October 27, 1998 in  
connection with the above-identified application states that the applicant has satisfied all  
of the requirements for the Petition except "(2) factual proof that the inventor refuses to  
execute the application or cannot be reached after a diligent effort". The Decision states  
that before a refusal can be alleged it must be demonstrated that a *bona fide* attempt was

made to present a copy of the application papers (Specification including Claims, Drawings and Oath or Declaration) to the non-signing inventor for signature.

Submitted herewith is the Supplemental Declaration of Haruo Hagimori in support of the Petition, appending a copy and an English translation of his letter dated August 2, 1997 asking the inventor, Mr. Kamei, to sign the Declaration accompanying the application. The Supplemental Declaration states that when the letter was sent to Mr. Kamei, Mr. Hagimori enclosed a complete copy of the application papers including the Specification, Claims and Drawings, as well as the Declaration that he asked Mr. Kamei to sign and that the application papers were sent to him at his known residence address. The Declaration also states that Mr. Kamei said he had received the application papers enclosed with the letter of August 2, 1997, but refused to sign the papers.

Accordingly, we respectfully submit that requirement (2) i.e. factual proof that the inventor refuses to execute the application, including proof that he was presented with a copy of the application papers, Specification including Claims, Drawings and Declaration, has now been satisfied and that the Petition should be granted.

Respectfully submitted,

Francis J. Hone
